

The benefits of weight-loss surgery go beyond what the eyes can see.

A study by the National Institutes of Health found that 10 to 15 years after having weight-loss surgery, obese patients were less likely to develop — and more likely to recover from — diabetes and other heart disease risk factors.

LAP-BAND® and Bariatric Support Group

Facilitated by Bailey Frumen, MSW, LCSW, this program is open to anyone considering weight-loss surgery or for those who have already had surgery. This monthly meeting provides patients and guests with an exceptional experience through our educational and support services.

Support Group is FREE, Registration is Required.

Monthly Meetings held on Saturdays at 11:30 a.m.

Jersey Shore University Medical Center
Brennan Entrance, Medical Staff Board Room

To register, please call 1-800-DOCTORS or visit our website at JerseyShoreUniversityMedicalCenter.com
